## SUMMARY

Front-end developer specialising in the MERN stack with two years experience building websites and web apps.

My portfolio is the best representation of my work:

<https://andy-brummitt.co.uk/>

## LATEST PROJECT

I recently built a bug tracking application used to monitor and organize development tickets which can greatly assist in any project contributed to by multiple developers. The web app comprises of a full login authentication system utilising JWT access and refresh tokens for team and user login portals. Teams of users can then upload feature and bug tickets to their respective accounts which are persisted in a MongoDB database. These can then be seen and then solved by other developers on their team. This project is built using the MERN stack and is hosted on Heroku: <https://andys-bug-tracker.herokuapp.com/> with the project code publicly available on my GitHub: <https://github.com/Andybrummitt>.

## SKILLS

Javascript

React

Node.js

Express

HTML

CSS

MongoDB

Git

Sass

NextJS

Adobe Photoshop

## EXPERIENCE

### XYLEM HOLDINGS

Customer Support, Order Fulfilment

2013-PRESENT

- Assisted with e-commerce website design and added products through e-commerce platform
- Designed customer mailshots and website banners using Adobe Photoshop
- Managed order dispatch and fulfilment
- Assisted with customer support enquiries

### HULL STINGRAYS

Professional Ice Hockey Player

2011-2013

## EDUCATION

### BSC HONS. SPORTS & EXERCISE PERFORMANCE

Writtle University College

2014 - 2017
